

Juan Manuel González

OPERATIONS & AUTOMATION / PROJECT COORDINATION

956 . 693 . 1317 · juanglz197@gmail.com · Austin, TX · www.gonzalezjuanm.com

Operations and automation specialist who turns manual, repetitive work into systems that run on their own. Four years coordinating projects and operations at a fast-paced B2B agency, managing 3,000+ tasks and 2,400+ client meetings. Now builds end-to-end automation for operations-heavy businesses, across onboarding, contracts, approvals, and filing, removing administrative overhead so owners and teams can focus on the work that matters.

01 PROFESSIONAL EXPERIENCE

PureSteel Construction Inc.

FULLY REMOTE · AUSTIN, TX

Operations & Automation Consultant

APR 2025 - PRESENT

- Designed and deployed a suite of internal automation workflows that replaced manual administrative work across subcontractor onboarding, change orders, and contract execution, saving the business an estimated 15 to 17 hours every month.
- Built an end-to-end subcontract agreement pipeline that carries a new subcontractor from intake form to signed, filed contract automatically, with AI-assisted scope formatting and e-signature routing, removing manual document preparation entirely.
- Developed a change order system that routes client approvals, sends automated reminders, generates signatures, and files completed documents on its own, replacing a manual email-and-spreadsheet process.
- Automated invoice and estimate creation in QuickBooks Online, with documents generated and sent to clients without the team ever needing to open QuickBooks.
- Built a team portal that houses all of the company's intake forms in one place, giving staff a single, simple entry point to start any workflow, with each form pulling the data it needs from existing spreadsheets in the background.

SalesLabX

FULLY REMOTE · AUSTIN, TX

Senior Marketing Account Manager

APR 2021 - APR 2025

- Led the overhaul of complex Salesforce Lead Assignment Rules and attribution models, coordinating across marketing and sales leadership and technical teams to improve data routing and reporting accuracy.
- Translated client needs into actionable project plans, managing 3,000+ tasks across milestones, task owners, and delivery timelines in a fast-paced SaaS environment.
- Facilitated 2,400+ client and internal meetings, serving as the primary point of coordination to ensure alignment and momentum across the project lifecycle.
- Managed the end-to-end design and rollout of multi-stage lead capture forms and global nurture programs, ensuring clean data flow between marketing and sales platforms.
- Investigated and resolved critical system roadblocks, including lead conversion errors and integration discrepancies, while producing technical documentation and Loom walkthroughs to simplify complex workflows for clients.

- Acted as the senior escalation point for technical and relationship issues across 20+ active accounts, ensuring project momentum and client retention.
- Partnered with agency leadership to analyze trends across the book of business, implementing new SOPs to improve onboarding consistency and delivery speed.
- Provided guidance to junior team members on complex Salesforce and MCAE (Pardot) workflows, reducing internal bottlenecks and improving overall output quality.
